In fact, with such a small field, I don’t think there’s any other team who has a chance of winning except the people who have won. And I’m not talking about the current winners, I’m talking about previous winners who have come along since,” he said. “Our view is that we don’t have to look at the short-term future, but we do want to look at the long-term future and have done for quite some time, and to do that you need a pathway to get to your future situation. “Our understanding is there will be a transfer system in place. We don’t know what it’s going to be but it’s there.” The supercars, superbikes, F1 cars and the old classics are gone, replaced by something new, and new owners are being welcomed to the new auto club. The New Zealand Motor Sport Guild’s annual meeting, for the first time in its 14-year history, has no home-grown group of supercars that represent a club identity. It’s a similar story in V8 Supercars, which has completed a \$150 million revamp of the Hidden Valley Motorsport Park, including a new track complex, bringing the category’s total spend to almost \$400 million. The list of supercars that will race at the circuit, part of the New Zealand motorsport network that stretches from the Manfeild Grand Prix in Invercargill to the Porsche Carrera Cup, features five international brands, including Toyota and Ferrari. Unlike in New Zealand’s motor racing club, where there was a relationship with SRO, the sport’s umbrella organisation, there is no one in charge of the event. The event is run by a committee that decides the format and the rules for each event
