Aquatic Studios 1 review for KeyMacro 1.5.2 A few weeks ago I encountered a problem with the import of a.docx file that was uploaded to my site. I reported the issue to Aquatic Studios, and they were more than helpful. They emailed me within minutes, and within minutes of me emailing them, they were on the case. They sent me a download link for a free trial of KEYMACRO, which I installed. I tried the import process again, and it worked. They emailed me back, and asked for me to send them a sample of the issues I was having with the import process. They set me up with a developer to help me with the problem. The developer sent me a test file with an error in it. I imported it to my site, and it worked fine, so it must have been my end problem. The developer told me how to get the data to where it needed to be, and that was the end of the conversation. I was using KeyMacro 1.3.2 before, and it never had a problem with my files.
