K. Ghosh. Smarajit Ghosh is also a member of IEEE and IMSEC. e79caf774b

Categories This website aspires to be the first resource on the Internet for engineers seeking a solution to difficult control system problems.

Please report all bugs and problems that you find and you will be credited in future updates as you improve the resource.

Q: CakePHP3 Custom Authentication Module - Login / Register error I created a custom authentication component, but I don't know what I am doing wrong. Registration / Login works fine with the built-in auth/auth component. I want to use custom fields in the registration / login. In the file Auth/Component/AuthComponent.php I wrote the following:

```
loadComponent('RequestHandler');
$this->loadComponent('Flash');
$this->loadComponent('Auth', [ 'userModel' =>
'Member', 'userAuth' => [ 'allowLogin' => true,
    'autoUseSession' => false, 'hashType'
=>'sha256', 'hashTypeCheck' => false, 'fields'
=> [ 'username', 'password' ] ] ]);
$this->Auth->fields = [ 'username' => 'email' ];
} public function isSession() { return true; }
```

---

public function beforeFilter(Event \$event) {

These include the "mastered by" lines to the left of the title. "Smarajit Ghosh" indicates that someone has mastered a skill or study or it is brand new, as in "Made by smarajit ghosh" means that is new and new. The basic line is yellow, the mastered line is magenta and both are treated the same in this example.

![mastered by smarajit ghosh][1] [1]: mastered by smarajit ghosh With this method no author tags are needed, as you can manually create them (the line will be put inside the author tags), so if you want to easily spot a book, you can give it in the example above: Lorem ipsum dolor
