Q: What does "moved during the last 24 hours" mean in the StackOverflow reputation graph? For example, this question: The first comment on the question was posted just before midnight, that's why the reputation graph shows that it (the reputation) was only earned yesterday. But the question itself was posted on 2020-01-22 at 03:40 and the comment was posted on 2020-01-21 at 22:29. So, why is it shown as yesterday? The reputation is divided into two parts, which are from 01/22 and 01/23: Does this mean that only the reputation earned during the last 24 hours was added into the graph? the real date (e.g. 01/22 20:00:00 d0c515b9f4
