Victory or Death - The first, free, PlayStation Network exclusive FPS where you play as a special ops soldier. Snipe out all the enemies on the battlefield and push them as far as you can to survive and complete your missions. You can even call in the big guns to wipe out the entire enemy team in a massive, all-out assault. Sniper Strike: Special Ops, compatible with PlayStation VR and PlayStation Aim, was developed by Spike Nzadi and The Farm 51 (industry award winning game studio), and will be released in Winter 2016.

Pre-clinical evaluation of novel sorafenib derivatives with potent angiogenesis inhibitory activity. We designed sorafenib derivatives to develop compounds with potent antitumor activity. We synthesized 19 sorafenib derivatives with improved pharmacokinetics properties, and evaluated their anti-tumor activity in vitro and in vivo. Sorafenib analogues with good pharmacokinetic properties were synthesized and evaluated for their anti-tumor activity against human U87MG and MCF-7 cancer cells in vitro and in vivo. The effects on tumor growth, apoptosis, cell cycle, cell invasion, and angiogenesis were assayed in vivo and in vitro. Sorafenib derivatives showed anti-tumor activity in vitro and in vivo. Sorafenib derivatives not only inhibited tumor growth in vivo but also induced cancer cell apoptosis and arrested cells in the G0/G1 phase. Both compounds down-regulated VEGF expression and induced tumor cell invasion. They also inhibited HUVEC migration and tube formation and induced tumor cell apoptosis, suggesting their anti-angiogenic activity. These results demonstrate the sorafenib derivatives with improved pharmacokinetic properties inhibit tumor growth and tumor angiogenesis, and are suggested to be promising chemotherapeutic agents.

The slow-growing *Epistolarias clavigera* is a highly appreciated ornamental plant native to Central and South America. It is often referred to as a Boston fern as it is often sold by garden centers and nurseries as "Boston" fern. In fact, "Boston" ferns include not only the true *Epistolarias clavigera*, but also its close relatives, including *Epipactis atrorubens* and *E. obliqua*. "Boston" ferns are prized as attractive perennial plants for bonsai, that are well suited

ect 2nd row i.e. last row based on conditions I have the below query which basically selects rows where the order contains the words in the ['condition'] field. How do I specify the conditions to select the last row in the db.ships.find().select([ { \$text: { \$search: ['condition'] } } ]).sort({ ship\_order : 'desc'}).limit(5) EDIT: To a slightly more clear example of what the problem is. Say I have 10 entries (rows) with the word'matt' in the on field. I want to select the last row which is the last entry (ie. first row). A: As you can see in the docs select y straight forward, you don't need to wrap the text fields. Here is a working snippet to achieve what you db.col.aggregate([ { \$match: { hosp: "a"}}, { \$group: { \_id: "\$hosp", document: { \$first: "\$\$ROOT"}, total: : :
