In a world where much of humanity is outfitted with Ink Armor, the hidden Sprinkler System serves as the last defense for the human body. Sprinklers operate independently of a person's consciousness in order to save human skin, and can effectively heal or replenish lost Ink! However, as Sprinklers themselves require power to operate, the Ink Population grows more powerful, causing the temperature to rise in the surface layers of the land. As the temperature increases, humans are unable to easily defend themselves. The aerial Ink Battles that erupted in the year 20XX erupted over entire areas of the surface world, and transformed the entire land into a conflict zone. You play as the Squad Captain of the Sprinklers in the so-called "invisible war" for humanity's future, and battle it out using your skills and your team. I started doing it and then afterwards, I'd go home and have a long conversation with my mom about the fact that I had a more difficult time learning to read and to understand a language. Her concern was not only my emotional stability, but the fact that if this would happen, all I'd be left with was my imagination, and that really wasn't going to be enough. MARTIN: Thank you so much, Maddie, for sharing your story with us. MAHONEY: Thank you, Martin. ROWAN: My client Priscilla wants to know what our advice is for navigating your adult life with a disability, in addition to the academic side. SKINS 45 HISTORIES 38 CALIBER 982 ARMAMENT Up until yesterday my Undead character was suffering - Perception is not my forte, thus, I cannot really run and gun with them. However, this trait - **WARNING** for Haunted Tomb was the key to some serious material. Sadly, not only I couldn't hold on to the ammo, but the enemies started shooting back and the wagon started getting hit; thus, game over. Having a bulletproof wagon would've been a dream come true, but the fact is there were too many of them; one needed a Colt-45 to get rid of 'em all. My VR was eight. Anyway, the Magnums that were in the chests brought me back to Earth and the faction was a disappointment. I had enough armaments, but not enough ammo for the hungry ASL's. Currently I'm running with 1/2 of my Blood Mages, 2/4 of my Witch Hunters and 1/4 of my Grave Dwarves. So, let's call this mission a 'decision' mission for now, as that's how it came down. But, if it didn't went the other way I may send an undead to - try and collect a key in Zolan or another stronghold. Instead of a default undead type for your campaign, now you'll be able to create a completely customizable undead type. PS: Yes, this means by default your first undeads will be half-buried in a dungeon and you'll have to leave them there until you can get them to a crossroad. While building your city, you'll be able to place down either terrain or structures - however, as you'll notice, structures didn't trigger any AI spawns, yet; other structures were listed as "occupied."
