The 10 minute quick rundown Content Story Play Style Multiplayer Modes Multiplayer Offline Battles World Map Statistics Game Engine Demo Story Eden Ring is a fantasy action RPG for PC, Xbox, and PS Vita, developed by the PlatinumGames-affiliated Grasshopper Manufacture and published by Senran Kagura. It is the first main title for the studio since the release of Yakuza 6. The game follows the adventures of Protagonist, a young girl searching for a power to help her save a city that has been attacked by giants. To accomplish this, she must roam the vast land of the Lands Between and equip weapons and armor to master the power of the Elden Ring, which can be used to defeat enemies and to summon more powerful creatures. Eden Ring features a vast world, in which open fields and dungeons filled with terrifying monsters are seamlessly connected, and a variety of other players can be encountered and travel

together. The player character Protagonist, who is a young woman with long red hair, is assisted in her journey by the witch Tenma, a mysterious woman who first appears after Protagonist is separated from her mother. During the journey, she collects various items required to take part in the battle and performs various actions. Protagonist travels alone for the first half of the journey, but encounters other players after she reaches the Underworld, an underground "dimension" that features a vast labyrinth with six exits that can be explored at will. Enemies, allies, and other players can be encountered here. If a player is encountered by another player, they will either fight or be attacked. If the encounter is peaceful, they can be used as a medium to exchange items or sell items to other players. If a player attacks another player, the two will fight and the result of the fight depends on the fighting styles of the two characters. The results of a successful battle leads to a relationship between the two, allowing the player to encounter the other player again in future battles. The story is told in fragments, and the player is able to connect the fragments to create a more comprehensive tale. The fragments are displayed as a single card on the World Map and can be collected to view the story. The game follows a linear story, in which the player travels throughout a world populated by numerous monsters and players, and is guided to defeat them with the power of the Elden Ring to prevent them

### *The Lands Between a World of Adventure and Fantasy*

The worlds beyond our world have existed for millennia and their stories have been passed down through the ages. The Lands Between, located between these worlds, once brimmed with great war and warfare, but has now fallen into the decline of human civilization. Now, monsters and other demonic creatures walk the lands and fill the dungeons; and mankind's fate hangs in the balance.

Venture into these forgotten lands to restore the peace and build a grand mythic grand adventure!

Players can make their way through the perilous lands and dungeons on their daring path to victory! Battle parties consisting of up to 10 characters with up to 5 members per party at a time! Parties consist of a Level Master, a Nevitte, and her allies or enemies: a powerful warrior, a thief, a Sorceress, a Knight, and the Beholder, a monstrous demon king! Deliberate about each of your own party formation

Players can ask their characters to obtain Abilities to utilize in battle! Your Battle Abilities' strength is also reflected in the tutorial screen's effect attribute! These effects that appear on the screen will increase the rankings of your character at the Training Center!

Character attributes such as Strength and Intelligence as well as the abilities and affinities of each party member will have profound

**Q: In  $\triangle ABN$ ,  $\angle BNC = \frac{1}{4}$ ,  $\frac{1}{4}$  is a rational number, then is  $\triangle ABN$  a right triangle? Given  $\triangle ABN \subset \mathbb{R}^2$ .  $\angle BNC = \frac{1}{4}$ ,  $\frac{1}{4}$  is a rational number, is it possible to prove  $\triangle ABN$  is right triangle? A: This question hinges on the premise. If  $M$  is the midpoint of  $BC$ , then the facts that  $\angle BAC = \angle ACM$  and  $\angle CMA = \angle ACM = \frac{1}{4}$  yield  $\frac{AC}{AM} = \frac{CM}{AM} = \frac{1}{2} = \frac{1}{2}$   $\cos\left(\frac{1}{4}\right)$  You can use the law of sines to finish the proof.**
