Even if you're not much of an artist, Photoshop will be an easy program to start with. It's a great program to learn because it has advanced features and has every feature a beginner might need. This article is a quick overview of Photoshop's features and how to use them. If you'd like to do more in-depth tutorials on some of the advanced features, check out the Web Resources at the end of this article. A Quick Tutorial on Photoshop To start, let's look at a few things you should know about Photoshop: * The best program for editing images, but it is not suitable for video or animation; a program with a toolset for these tasks is the Adobe Media Encoder * Photoshop's layer system and its organization concepts are slightly different from Windows Let's take a closer look at each of these. Image Editing with Photoshop Photoshop is a raster image editor. A raster is a bitmap image where each pixel is a dot in an image. Many images consist of thousands or even millions of pixels and are used for everything from your desktop wallpaper to your inkjet photographs. Image editing with Photoshop is similar to using Microsoft's Paint. You can add text, lines, and shapes to an image, fill in white areas, and crop the edges. You can also add images to an image, rotate the image, flip it vertically or horizontally, and even perform some mathematical transforms. There are lots of other basic functions that Photoshop provides. You can also group layers together and color adjust layers using the layer styles as well as quickly fix problems using the Repair tool or paint some colors. The most basic features of Photoshop are * 2 Windows where you can view the screen * The Layers palette where you can organize your image's layers * A Windows palette * The menu bar where you can select commands Let's start off by opening up a new image. You have lots of choices. Choose New from the File menu. Choose Photoshop from the Graphics menu to open it. Alternatively, you can click the blue rectangle to the right of the menu bar at any time. After that, Photoshop will open a new image. If you try this, it won't work. You can't create a layer while it's opening up a new image. There's no image in a new file. It needs an image to work with. So instead, click

The man who made one of the most significant discoveries in American naval history in August 1943 has been awarded the Navy Cross—second only to the Medal of Honor—for his heroism in the Pacific. James Norman Edwards was a radioman-gunner aboard the cruiser USS San Francisco (CA 36) when the vessel was struck by a kamikaze mid-morning on 9 August 1943 and sank. The attack prompted the decision to sink the stricken ship with a torpedo in an attempt to save the crew. On Thursday, President Obama awarded the Navy Cross to Edwards, describing the “heroism” he showed in those terrifying moments. Edwards died this year at the age of 100, leaving behind a legacy of discoveries that have kept countless sailors and Marines alive during wartime. In November 2013, Edwards publicly and gratefully admitted that he was “the one who gave the order” to search for the watertight compartments that saved the lives of so many. Despite these numerous accolades, Edwards had largely kept a low profile over the last 60 years. Until his death in mid-2017, he lived a quiet life at his home in Torrance, California. Friends said the only interest he showed in his amazing story was “to see his name in print.” Sir James Edwards outlived his wife by more than 10 years and is survived by a family of eight grandchildren and a great-grandchild. His personal effects were buried in a tube marked “private property,” along with the service medals he’d won. Meanwhile, the University of Connecticut (UConn) honored Edwards’ dedication to radioman education by naming a series of buildings after him. “Jim Edwards clearly is an American hero, but his true legacy is the importance of education in promoting our strategic advantage for our country,” a University of Connecticut press release stated on Thursday. The university said that its Jim Edwards College of Engineering building would feature an exhibit that details the Radioman Extraordinary achievement of James Norman Edwards and would showcase Edwards’ significant contribution to UConn. The Jim Edwards College of Engineering building is expected to open in 2021.
