## RaviKalakotaAndrewWinstonFrontiersofElectronicCommerceAddisonWesleyzip

How do I solve it? A: You need to upgrade your .NET Framework version. It looks like your project might be targeting .NET 2.0, but the .NET framework you are running is 4.5.3. That's why it doesn't compile. You can find a version of the .NET Framework you need on this link: Microsoft Site, and if you don't have it installed on your computer, you can download .NET Framework 4.5.3 here.

```
package com.turbus.player.model.bean; import java.io.Serializable; /** * @author Vivek Gajjar */ public class NativePlayerType implements Serializable { private String nativeType; private String type; public NativePlayerType(String nativeType) { this.nativeType = nativeType; } public NativePlayerType(String type) { this.type = type; } public String getNativeType() { return nativeType; } public void setNativeType(String nativeType) { this.nativeType = nativeType; } public String getType() { return type; } public void setType(String type) { this.type = type; } @Override public String toString() { return getNativeType()+"!"+getType(); } }
```

This invention relates to means for charging multiple batteries through a common external charger in time-multiplexed fashion. This invention relates to apparatus to charge multiple battery cells connected in series. This invention relates to charging multiple battery cells connected in series. This invention relates to apparatus to charge multiple battery cells connected in series. Battery cells are used for storing energy and providing power to electrical devices. High voltage battery cells used in automotive applications must be able to withstand high stress voltages. High voltage battery cells often are connected in series with charging equipment. U.S. Pat. No. 5,204,847 describes charging apparatus to charge a plurality of battery cells connected in series. In the '847 patent, each cell is charged in c6a93da74d
